"PATENT APPLICATION"

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of

ROBERTO MORELLI ET AL

U.S. Serial No. 10/588,797

Group Art Unit 3654

Filed: August 28, 2006

Sang Kim, Examiner

METHOD AND MACHINE FOR THE PRODUCTION
OF LOGS OF WOUND WEB MATERIAL

Alexandria, Virginia
August 20, 2009

Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450

R E S P O N S E

Dear Sir:

This is in response to the official action mailed
July 23, 2009.

The Examiner has required an election of species
based on the following: Species I - Figures 1A-1D; Species
II - Figures 6A-6E; Species III - Figure 7. The Examiner
has also required that upon election of a species, the
applicants should also specify a suction box based on the
suction boxes shown in Figures 2-3 and Figures 4-5.

Applicants hereby elect Species II above, i.e.,
Figures 6A-6E. Applicants submit that claims 29-43, 46-59
and 62-64 are readable upon the elected species.

6755/USSN 10/588,797
Group Art Unit 3654

As to the election of a suction box, applicants traverse this requirement as not being applicable to the elected species. As set forth in the specification, at page 15, lines 7-10, the further embodiment of Figures 6A-6E is substantially the same as the embodiment of Figures 1A-1D, but that the suction member of the embodiment of Figures 1A-1D is replaced by a mechanical interruption member 111. Accordingly, the selection of a suction box embodiment does not apply to Species II.

Applicants reserve the right to file a divisional application containing claims drawn to the non-elected subject matter, i.e., Species I and Species III.

Favorable consideration of the application is requested.

Respectfully submitted,

ROBERTO MORELLI ET AL
